Summary

B.E. Computer Science graduate (2026) dedicated to building robust backend systems using Core Java, Spring Boot, and Microservices. Highly enthusiastic about clean code, efficient REST API design, and database optimization. Proven through hands-on development of scalable multi-tenant architectures and automated CI/CD pipelines

Projects

NexoraSpace — Multi-Tenant GenAI SaaS Platform

NexoraSpace

- Architected a multi-tenant backend infrastructure supporting over 3 isolated tenant data streams with robust JWT-based authorization.
- Integrated enterprise REST APIs and streamlined background task orchestration for multi-tenant query management.
- Streamlined database access paths and query indexing, reducing API latency and accelerating response times by 30
- GitHub Actions CI/CD pipelines were deployed to execute test suites and ship production code, cutting manual release overhead to zero.

Employee Management System

Employee Management System

- Engineered a dual-role access control system (Admin and Employee portals) to manage more than 500+ workforce attendance and leave logs securely.
- Developed an asynchronous payroll engine to execute bulk salary calculations and dynamically generate PDF paylips in under 2 seconds.
- Delegated computationally intensive operations to separate worker threads, keeping core application response loops unblocked.
- Structured normalized relational schemas and tuned SQL index lookups for high-speed tracking of corporate payroll histories.

Technical Skills

Languages & Web	: Java (Core Java, OOPs, Collections, Lambda, Streams), JavaScript (ES6+), HTML5, CSS3
Frameworks & Core	: Spring Framework 5, Spring Boot 2, Spring Web MVC, REST APIs, Microservices Architecture
Persistence & SQL	: Spring Data JPA, Hibernate ORM, SQL, MySQL, PostgreSQL, H2 Database
Security & Testing	: Spring Security, JWT, OAuth2, JUnit 5, Mockito, Integration Testing
Tools & DevOps	: Apache Maven, Gradle, Docker, Postman, Git, GitHub, GitHub Actions (CI/CD)

Certifications

- Java Spring Framework, Spring Boot, Spring AI — Gen AI *Udemy (Telusko / Navin Reddy)*

Education

Lokmanya Tilak College of Engineering, Navi Mumbai	2026
B.E., Computer Science & Engineering (IoT, Cyber Security & Blockchain)	
S.S. High School & Junior College, Navi Mumbai	2022
Higher Secondary School (HSC, Class XII)	
St. Xavier's High School & Junior College, Navi Mumbai	2020
Secondary School (SSC, Class X)
